

5CO & 5COI MODELS

ROLL FORMED ALUMINUM OPPOSED BLADE DAMPER

- Opposed blades set.
- Designed to improve air handling performance and reduce operational costs.
- Allows precise air volume control with a minimum distortion of air distribution pattern.
- Activated by an actuator operated with a 5/32" Allen wrench, accessible from the register face.
- Available in standard sizes CO model grilles and standard sizes COI model diffusers.

CONSTRUCTION: Rolled formed aluminum.

FINISH: Standard white Anodic acrylic paint.

PERFORMANCE:

Its appropriate application in exhaust devices (Grilles and Diffusers) minimizes the pressure losses inside the duct and the air distribution system.
